LIBERTY

Why Liberty horseshoe nails – Benefits for the farrier and the horse:

The innovative production process is unique to Liberty horseshoe nails. Liberty nails are always very smooth and sharp and feature fine details, such as beveled sides and a sharp point. This makes nailing easier and causes less damage to the horn material, both on the inside and outside of the hoof.

HYBRID

For riding horseshoes

Hybrid combines the benefits of various popular horseshoe nail models, so you only need one type. Hybrid is stronger than E and M, longer than ESL, and thinner than LX. Furthermore, There is extra pitch on both sides of the nail head for a perfect fit in the crease.

Also available in Steel

CARRERA

For race plates

Carrera has the perfect fit for creases and nail holes in race plates. Choose from three lengths: Short – Medium – Long.

Also available in Steel

HYBRID SECURE

For riding horseshoes

The 'Secure' nail head is wider and fills the crease more. This results in a larger bearing surface and slower nail wear, ensuring horseshoes stay securely in place longer. You will notice this especially on hard surfaces. Secure nails are a much better solution than using nails with tungsten pins.

CARRERA SECURE

For race plates

HARDTOP

Technology

The head and neck of the nail are hardened through precisely controlled heat treatment, allowing the nail to wear down flush with the shoe.

CU SHIELD

Technology

The steel nail is fully sealed with a layer of 100% red copper. This prevents rust and helps to keep the horn material stronger and healthier.

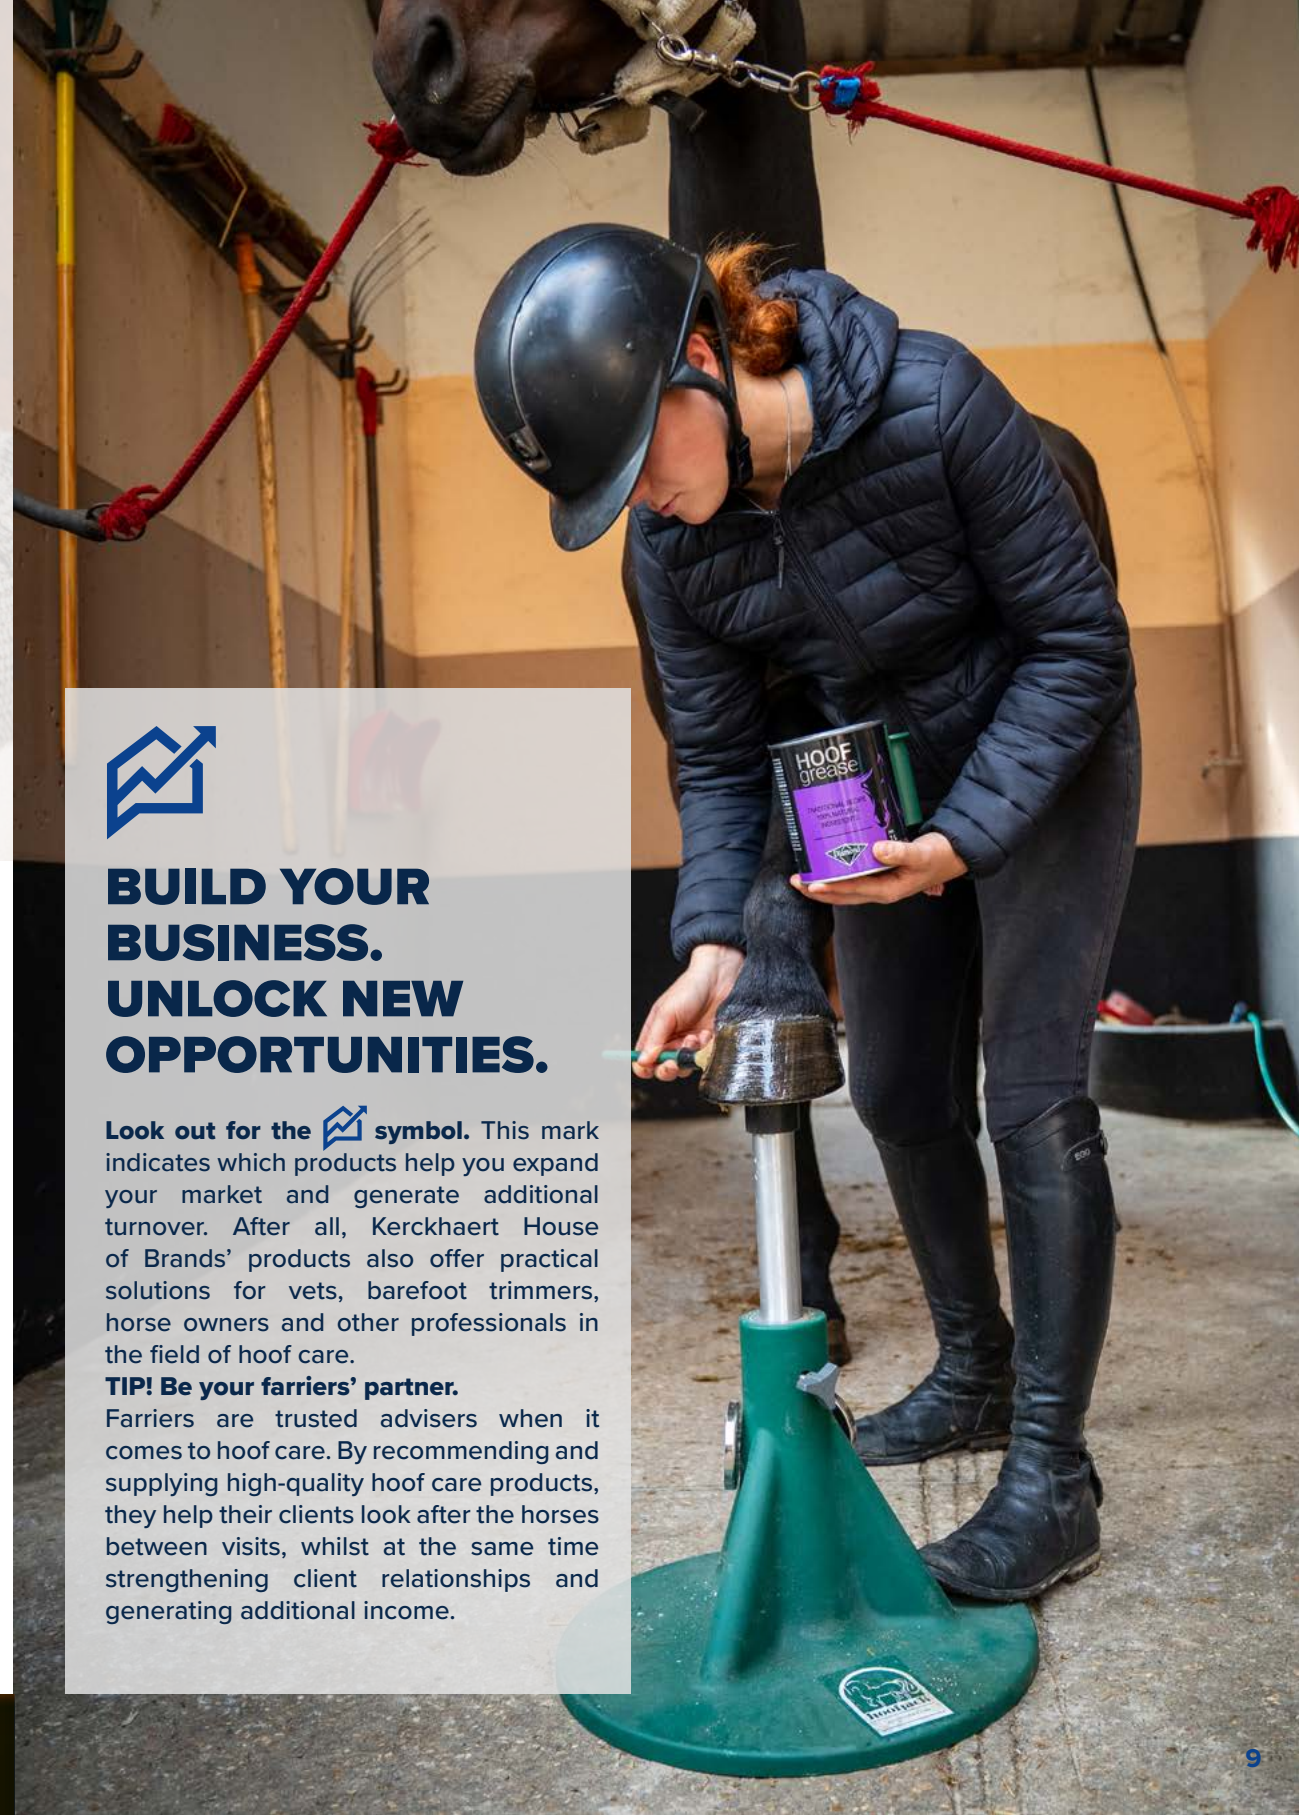

BUILD YOUR BUSINESS. UNLOCK NEW OPPORTUNITIES.

Look out for the  symbol. This mark indicates which products help you expand your market and generate additional turnover. After all, Kerckhaert House of Brands' products also offer practical solutions for vets, barefoot trimmers, horse owners and other professionals in the field of hoof care.

TIP! Be your farriers' partner.

Farriers are trusted advisers when it comes to hoof care. By recommending and supplying high-quality hoof care products, they help their clients look after the horses between visits, whilst at the same time strengthening client relationships and generating additional income.
